1

Vaccines: Panacea or Pandora's Box?

- Why people are concerned
- The CDC whistleblower
- Why you won't hear this in the media
- Why only you are responsible
- The latest science

2

CDC Vaccine Schedule to Age 6

1953		1983		2013	
Vaccines	Doses	Vaccines	Doses	Vaccines	Doses
Diphtheria	4	Diphtheria	5	Diphtheria	5
Tetanus	4	Tetanus	5	Tetanus	5
Pertussis	4	Pertussis	5	Pertussis	5
Smallpox	4	Measles	1	Measles	2
		Mumps	1	Mumps	2
		Rubella	1	Rubella	2
		Polio	4	Polio	4
				Hib	3
				Rotavirus	3
				Hepatitis B	3
				Pneumococcal	4
				Influenza	7
				Chicken Pox	2
				Hepatitis A	2
Total Doses	16		22		49

Source: CDC

3

CDC Vaccine Schedule to Age 18

1983		2014	
Vaccines	Doses	Vaccines	Doses
Diphtheria	5	Diphtheria	6
Tetanus	6	Tetanus	6
Pertussis	5	Pertussis	6
Measles	1	Measles	2
Mumps	1	Mumps	2
Rubella	1	Rubella	2
Polio	4	Polio	4
		Hib	3
		Rotavirus	3
		Hepatitis B	3
		Pneumococcal	4
		Influenza	19
		Chicken Pox	2
		Hepatitis A	2
		HPV	3
		Meningococcal	2
	23		69

Source: CDC

4

Adult Vaccine Schedule:

If you live to 80 and follow CDC's schedule, you'll get another 84 doses of 11 vaccines

- Flu shot annually
- Shingles - one
- TDaP - one
- Tetanus-Diphtheria (every 10 years)
- Varicella – two
- HPV – three
- MMR – two
- Pneumococcal – one

Source: CDC

5

Vaccine Failure

- We have to ask ourselves why so many boosters, why so many shots after age 6 or age 18?
- Don't vaccines work the way they are intended to?
- Or is the notion of vaccine induced immunity a myth, does vaccine induced immunity actually last?

6

Vaccines: Why are people concerned?

- Vaccine Ingredients
- Flawed/Lacking Safety Studies
- Poor health of our population
- Stories and reports of vaccine injuries
- Education: what accounts for low disease rates
- Disease outbreaks despite vaccination
- NO legal liability for vaccines for anyone
- Corruption

7

Vaccine Ingredients:

Cells from aborted fetuses	Aluminum
Monkey kidneys	Mercury
Chicken embryos	Formaldehyde
Mouse brain	Yeast
Chicken kidneys	Antibiotics
Monkey lung tissue	MSG
Cow milk protein	Polysorbate 80
Sheep blood	Disinfectant
Cow heart	Soy protein
Cow pancreatic enzymes	Antibacterials
Human blood protein	Viruses
Gelatin – various animals	Bacteria
Calf serum	Genetically engineered organisms

http://www.cdc.gov/vaccines/pubs/pinkbook/downloads/appendices/B/excipient-table-2.pdf

8

Vaccines: Flawed Safety Studies

- Placebos are not placebos
- Vaccines studied singly but given in large combinations
- Vaccine safety studies use healthy subjects
- Vaccine research compares vaccinated to vaccinated populations
- No large, long-term clinical study comparing vaccinated to unvaccinated

9

Vaccines: Declining Health of Children

- 13% (10 million) on prescription meds
- 9% (6.8 million) children with asthma
- 11% (8 million) respiratory allergies
- 6% (4.5 million) food allergies
- 12% (9 million) skin allergies
- 8% (4.9 million) learning disability (10% boys)

http://www.cdc.gov/nchs/data/series/sr_10/sr10_258.pdf

10

Vaccines: Declining Health of Children

- 54% of US kids chronically ill or obese[1]
- 26% at risk of developmental disability (0-6yrs)[2]
- 1 in 50 kids has autism, 1 in 31 boys (3%)[3]
- 31% are overweight or obese[4]
- 1 in 400 diabetic (+20% in 10 years)[5]
- 1 in 300 boys, 1 in 333 girls develop cancer[6]

11

Poor Health of Population

- US spends $2.7 TRILLION on healthcare
- US spends $270 BILLION on drugs
- US spends $8745 per capita on healthcare vs. OECD average of $3484
- US life expectancy 78.7, OECD avg. 80.2 years, Iceland, Japan, Switzerland 83 years
- US infant mortality rate 6 per 1000 live births, OECD avg. 4, Iceland 1.1, Slovenia 1.6, Japan 2.2

Organization for Economic Cooperation and Development, OECD

12

Vaccine Injury Reports to Vaccine Adverse Reporting System (VAERS) since 1989

- 64,513 reports of "serious" adverse reactions
- 163,010 reported visits to ER
- 49,569 reported hospitalizations
- 65,934 did not recover
- 5,736 reported deaths

VAERS is a passive surveillance system and estimates are that only 1%-10% of all adverse reactions are reported, some reports come from outside US

https://vaers.hhs.gov

13

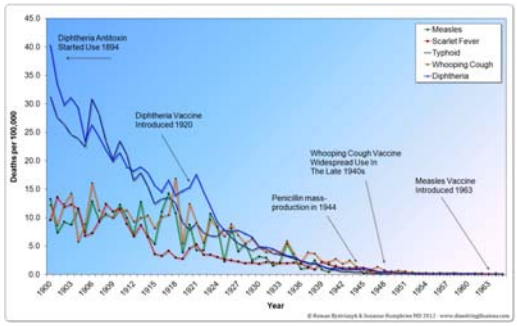
Did Vaccines Truly Save Us?

Syracuse, NY Shanties Back to Open Sewer

Source: Dissolving Illusions

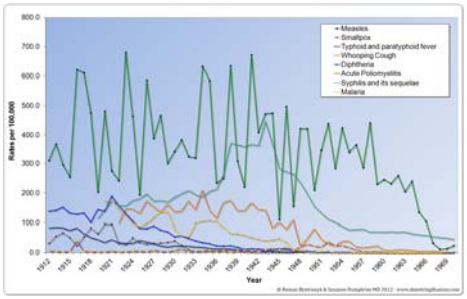
14

Declining Disease Mortality in US Before Vaccinations



15

Declining Disease Incidence in US Before Vaccinations



16

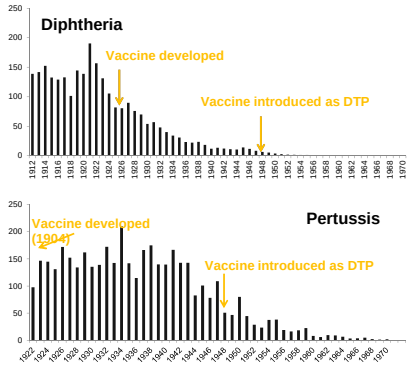
Guyer et all, Pediatrics, June 2000

"Thus vaccination does not account for the impressive declines in mortality seen in the first half of the twentieth century…. The major declines in child mortality that occurred in the first third of the 20th century have been attributable to a combination of improved socioeconomic conditions in this country and the public health strategies to protect the health of Americans…State and local health departments implemented these public health measures including water treatment, food safety, organized solid waste disposal, and public education about hygienic practices.

http://www.ncbi.nlm.nih.gov/pubmed/11099582

17

Historical Statistics of the US, Colonial Times to 1970

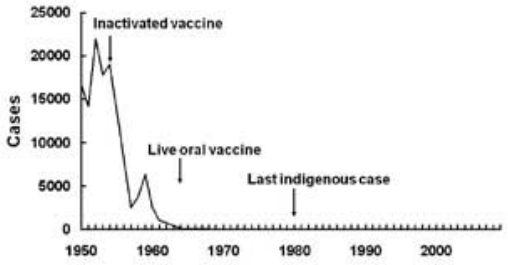


18

The Case of Polio

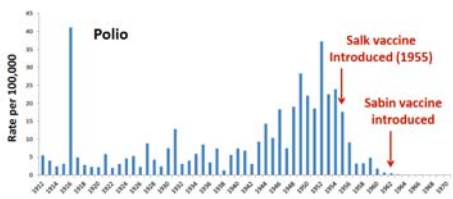
19

Polio – What CDC tells us



20

Historical Statistics of the US, Colonial Times to 1970



1955: Change in diagnostic criteria for polio:

- More restrictive +
- Coxsackie virus infections and aseptic meningitis NO longer misdiagnosed as polio

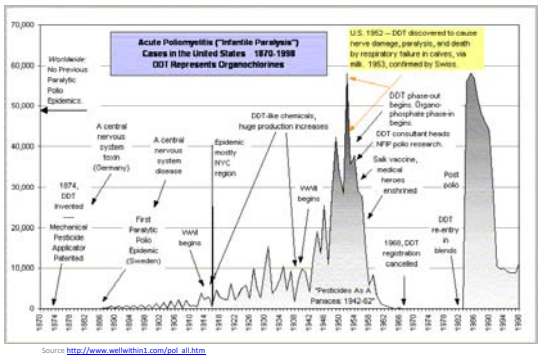
=

- Decrease in # of reported polio cases

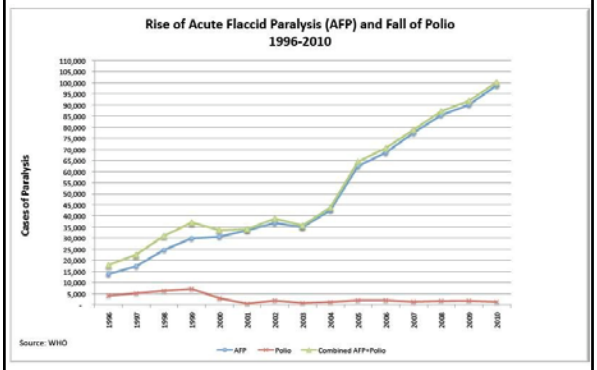
21

22

Polio and Pesticides



Source http://www.wellwithin1.com/pol_all.htm



24

Disease Outbreaks Despite High Vaccination Rates

- Pertussis – San Diego, 2012, 85% of cases fully vaccinated.[1]
- Mumps – US, 2005-6, 87%-99.6% fully vacc..[2]
- Measles – Global, 50-99% fully vaccinated.[3]
- Non-polio acute flaccid paralysis – 60,000 cases in India.[4]

1 http://www.kpbs.org/news/2014/jun/12/immunized-people-getting-whooping-cough/
2 http://cid.oxfordjournals.org/content/47/11/1458.full.pdf+html

25

NO Liability since National Childhood Vaccine Injury Act of 1986

- 75 cent tax on every vaccine sold to fund injury compensation
- $3 billion paid out to vaccine injured
- Vaccine makers have no liability
- Doctors have no liability
- Federal and state laws are routinely broken by vaccine providers

http://www.hrsa.gov/vaccinecompensation/index.html

26

Corruption: Revolving Door

- CDC Director Julie Gerberding became President of Merck Vaccines.[1]
- NIH Director Elias Zerhouni became president of Sanofi R&D.[2]
- Merck consultant Paul Offit sat on CDC's Advisory Committee on Vaccines while developing rotavirus vaccine and occupying $1.5m Chair at CHOP funded Merck.[3]
- 37% of AMA's lobbyists formerly worked in government.[4]

1 http://transcripts.cnn.com/TRANSCRIPTS/0803/29/lkl.01.html
2 http://hcrenewal.blogspot.com/2010/12/former-nih-director-spins-trhough.html

4 https://www.opensecrets.org/orgs/summary.php?id=D000000068

27

Corruption & Fraud

- Kenya - secret forced sterilization of women with hCG-tainted tetanus vaccine.[1]
- India - 47,500 cases of non-polio acute flaccid paralysis in 2010 in direct proportion to oral polio vaccines given.[2]
- Mumps vaccine fraud – Whistleblowers claim Merck "omitted, concealed, and adulterated material information".[3]

1 http://www.news.va/en/news/africakenya-the-bishops-what-does-the-tetanus-camp
2 http://www.issuesinmedicalethics.org/index.php/ijme/article/view/11

28

Corruption/Fraud: CDC Whistleblower

- Senior CDC scientist admitted he and others 'cooked' research to conceal MMR-autism link.[1]
- Omitted data showing a 2.5 fold increase in autism in African American boys post MMR.[2]
- Omitted data finding all children at increased risk of 'isolated' autism (1.5 x).[3]
- Admits mercury in vaccines causes tics and features of autism.[4]
- Admits mercury in vaccines unsafe for pregnant women.[5]
- None of this covered by "mainstream" media

1 http://www.morganverkamp.com/august-27-2014-press-release-statement-of-william-w-thompson-ph-d-regarding-the-2004-article-examining-the-possibility-of-a-relationship-between-mmr-vaccine-and-autism/

29

IOM Report 1991

"In the course of its review, the committee encountered many gaps and limitations in knowledge bearing directly and indirectly on the safety of vaccines. These include inadequate understanding of the biologic mechanisms underlying adverse events following natural infection or immunization, insufficient or inconsistent information from case reports and case series, inadequate size or length of follow-up of many population-based epidemiologic studies, and limited capacity of existing surveillance systems of vaccine injury to provide persuasive evidence of causation. The committee found few experimental studies published in relation to the number of epidemiologic studies published. Clearly, if research capacity and accomplishment in these areas are not improved, future reviews of vaccine safety will be similarly handicapped.

http://www.nap.edu/openbook.php?record_id=1815&page=8

30

IOM Report 1994

"The lack of adequate data regarding many of the adverse events under study was of major concern to the committee. Presentations at public meetings indicated that many parents and physicians share this concern."

http://www.nap.edu/openbook.php?record_id=2138&page=305 - p20006459s9970305001

31

IOM Report, August 2011

"The committee finds that evidence convincingly supports a causal relationship between some vaccines and some adverse events—such as MMR, varicella zoster, influenza, hepatitis B, meningococcal, and tetanus-containing vaccines linked to anaphylaxis. Additionally, evidence favors rejection of five vaccine-adverse event relationships, including MMR vaccine and autism and inactivated influenza vaccine and asthma episodes. However, for the majority of cases (135 vaccine-adverse event pairs), the evidence was inadequate to accept or reject a causal relationship. Overall, the committee concludes that few health problems are caused by or clearly associated with vaccines."

http://www.iom.edu/Reports/2011/Adverse-Effects-of-Vaccines-Evidence-and-Causality.aspx

32

IOM Report, January 2013

- "Key elements of the immunization schedule—for example, the number, frequency, timing, order, and age at the time of administration of vaccines—have not been systematically examined in research studies."
- "Evidence from assessments of health outcomes in potentially susceptible subpopulations of children who may have an increased risk of adverse reactions to vaccines was limited and is characterized by uncertainty..."
- "None has compared entirely unimmunized populations with those fully immunized for the health outcomes of concern to stakeholders."
- "The committee found no significant evidence to imply that the recommended immunization schedule is not safe."

http://books.nap.edu/catalog.php?record_id=13563

33

Why you won't hear this in the media

- Vaccines are big business
- Government is biggest purchaser of vaccines
- Censorship – requested by US Department of Health and Human Services (HHS)
- Pharmaceutical industry buys influence
- Trade Groups like AMA and AAP take millions
- Pharmaceutical Industry Advertising = big bucks

34

Vaccines are Big Business

- $5 billion of revenues in 2000
- $24 billion in 2013
- Forecast $100 billion by 2025
- 120 new products in pipeline
- Important engine of pharma industry growth
- US Government biggest purchaser - $4 billion
- Compensation

http://who.int/influenza_vaccines_plan/resources/session_10_kaddar.pdf

35

Why you won't hear this in the media

Government requested censorship:

"There are groups out there that insist that vaccines are responsible for a variety of problems, despite all scientific evidence to the contrary. We (the office of Secretary of Health and Human Services) have reached out to media outlets to try to get them not to give the views of these people equal weight in their reporting."

-- Kathleen Sebelius, Secretary, HHS

http://www.ageofautism.com/2010/03/sebelius-asks-media-to-censor-autism-debate.html

36

Pharma Buys Influence

- $750 million (1/3) of all CMEs for doctors in 2011 funded by pharma[1]
- $380 million in 5 months in 2013 to 'buy' doctors and hospitals[2]
- $225 million on lobbying in 2013[3]
- $36 million donated to political campaigns in 2012, more than any other industry[4]

1 http://www.peertrusts.org/en/research-and-analysis/fact-sheets/2013/11/11/persuading-the-prescribers-pharmaceutical-industry-marketing-and-its-influence-on-physicians-and-patients

3 http://robertreich.org/post/99279814695
4 http://robertreich.org/post/99279814695

37

Medical Trade Groups get $$$

- American Academy of Pediatrics and American Medical Association are TRADE GROUPS
- AAP takes millions "for conferences, grants, medical education classes and even helped build their headquarters"[1]
- AMA takes millions – 20% of its budget from pharma[2]
- AMA spent $18 million lobbying in 2013[3]

1 http://www.cbsnews.com/news/how-independent-are-vaccine-defenders/

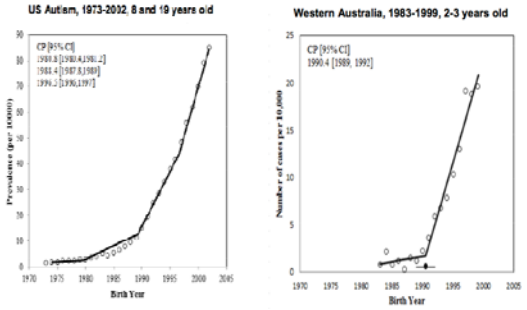
42

Human Fetal DNA and Retroviral Contamination of Vaccines – Result?

- New vaccines linked to significant rise in Autism
- Neuro-developmental disabilities epidemic
- Excess de novo genetic mutations
- Childhood cancer epidemic - lymphoma and leukemia
- High levels of fetal cell contamination in vaccines (142-2000ng per dose, 10ng = "safe")

http://www.ms.academicjournals.org/article/article1409245960_Deisher%20et%20al.pdf
https://www.regonline.com/custimages/240000/244811/NCNV%20III/Day%203/Session%205/Keith%20Peden,%20Ph.D..pdf

Autism, MMR, and Varicella Vaccines



US Autism Relative to Environmental Factors

- Autism rates are increasing
- Lead, organochlorine pesticides and, vehicle emissions all declining strongly
- Flame retardants, aluminum adjuvants, and glyphosate increasing
- Autism is environmental

http://www.ehjournal.net/content/13/1/21

"Aluminum content of human semen: Implications for semen quality"

- Measured Al concentration in semen
- Al high relative to other body fluids
- Lowest sperm counts had highest Al concentration
- Al detected inside sperm
- Frightening implications

http://www.sciencedirect.com/science/article/pii/S0890623814002548

Aluminum Based Adjuvant (ABA)

- ABA identified inside monocytic T helper 1 (TH1) cell line[1]
- ABA seen in cytoplasm
- TH1 cells important part of immune system[2]
- What are the implications of ABA being taken inside immune cells?

1 http://www.nature.com/srep/2014/140905/srep06287/full/srep06287.html
2 http://www.ncbi.nlm.nih.gov/pubmed/16877725

"Neurologic adverse events following vaccination"

- 2-3 vaccines can overcome genetic resistance to autoimmunity
- Cerebrospinal fluid of autistics contains high measles antibodies AND auto-antibodies to MBP
- Vaccination => high levels of antibodies, auto-antibodies, and cytokines => blood brain barrier permeability => neuro-immunity
- Immune molecules play integral roles in CNS development despite dogma
- Neurological affects of vaccines:
  - Multiple sclerosis - hepatitis B vaccine
  - Guillain-Barre syndrome – influenza, hepatitis, meningitis C, polio, and HPV vaccines
  - Transverse myelitis after cholera, typhoid, polio, and influenza vaccines
  - Flaccid paralysis, meningitis, encephalitis, convulsions and facial palsy after live polio vaccine

http://progress.umb.edu.pl/sites/progress.umb.edu.pl/files/129-141%20Sienkiewicz.pdf

Acute Disseminated Encephalopathy Onset

- 404 cases considered
- Median patient age = 18
- Interval from vaccination to onset 2-30 days in 61% of cases
- Flu and HPV vaccines most frequently, account for almost 30% of cases
- Not exclusive to young children
- Drawbacks of surveillance system

http://www.plosone.org/article/fetchObject.action?uri=info%3Adoi%2F10.1371%2Fjournal.pone.0077766&representation=PDF

49

Aluminum and Macrophagic Myofasciitis

- Muscle pain and weakness
- Chronic fatigue
- Joint pain
- Depression
- Cognitive dysfunction: almost constant, inter-hemispheric disconnection, memory loss, and impaired executive functions
- Associated with autoimmune disease
- May occur up to 10 years following vaccination

http://www.orpha.net/consor/cgi-bin/OC_Exp.php?Lng=GB&Expert=592

50

HPV Vaccine and Primary Ovarian Failure (POF)

- POF = premature menopause
- 20-30% of POF has autoimmune etiology
- HPV vaccines cause autoimmune disease
- Auto-antibodies found in 2/3 patients
- Other symptoms: joint pain, sleep disturbances, cognitive dysfunction – also seen in other HPV vaccine injuries
- Vaccine fragments found in those deceased after HPV vaccines

http://www.ncbi.nlm.nih.gov/pubmed/23902317

51

Hepatitis B Vaccine and Vaccine-Induced Cell Death

- Induces apoptosis
- Significant increases in activated caspase 3
- Mitochondria release chemical that triggers cascade of apoptosis
- Conclusion: low dose of Al containing Hepatitis B vaccine "leads to loss of mitochondrial integrity, apoptosis induction, and cell death"
- Effect observed in vitro and in vivo

http://www.ncbi.nlm.nih.gov/pubmed/22249285

52

Risks of Injected Aluminum

- Al in parenteral (injected) drug products could result in a toxic accumulation of aluminum
- Newborns may be at high risk of exposure to unsafe amounts of aluminum
- Studies show Al may accumulate in the bone, urine, and plasma of infants
- Parenteral Al bypasses the protective mechanism of the GI tract and circulates and is deposited in human tissues
- Aluminum toxicity is difficult to identify in infants

http://www.fda.gov/ohrms/dockets/98fr/oc0307.pdf

53

Dialysis encephalopathy

- Syndrome observed in chronic renal insufficiency patients on dialysis
- Dementia
- Speech alterations
- Myoclonias (muscle spasm and contraction)
- Asterixis (flapping tremor of hand)
- Convulsions
- Results in death in most cases
- Al toxicity is indicated frequently as underlying cause

http://ndt.oxfordjournals.org/content/20/11/2581.full

54

Similar Symptoms

Alzheimer's
- Memory loss/Dementia
- Cognitive impairment
- Speech alterations
- Repetitive speech/actions
- Wandering
- Withdrawal
- Loss of motor skills
- Fear/paranoia

55

FDA's Criteria for Al Exposure

- FDA's maximum Al received by IV per day is 25mcg
- Suggested Al per day is 5mcg / Kg bodyweight

http://www.accessdata.fda.gov/scripts/cdrh/cfdocs/cfcfr/CFRSearch.cfm?fr=201.323

56

Aluminum

Safe Amount from FDA
- 8 pound, healthy baby: 18.16 mcg
- 15 pound, healthy baby: 34.05 mcg
- 30 pound, healthy toddler: 68.1 mcg
- 50 pound, healthy child: 113 mcg
- 150 pound adult: 340.5 mcg
- 350 pound adult: 794.5 mcg

http://www.vaccinesafety.edu/package_inserts.htm

Actual Amount in ONE shot
- Hib (PedVaxHib brand only) – 225 mcg per shot
- Hepatitis B – 250 mcg
- DTaP – ranges from 170 to 625 mcg
- Pneumococcus – 125 mcg
- Hepatitis A – 250 mcg
- HPV – 225 mcg
- Pentacel (DTaP, HIB and Polio combo) – 330 mcg
- Pediarix (DTaP, Hep B and Polio combo) – 850 mcg

57

Thimerosal-containing Vaccines and Neurodevelopmental Disorders (ND)

- Examined pervasive developmental disorder (PDD), specific developmental delay, tic disorder or hyperkinetic syndrome of childhood
- Calculated cumulative dose of thimerosal in Hep B vaccine birth to 6 months
- Kids with NDs significantly more likely to have received increased exposure to Hg (mercury)

http://www.google.com/url?sa=t&rct=j&q=&esrc=s&source=web&cd=2&ved=0CC0QFjAB&url=http%3A%2F%2Fwww.mdpi.com%2F1660-4601%2F11%2F9%2F9156%2Fpdf&ei=mBlcVM_GJ_iQsQTwtoGAAg&usg=AFQjCNHu5B4y4-nFM8QSqalb1aqPTIIopA&bvm=bv.79184187,d.cWc

58

Mercury Poisoning

- Digestive problems: diarrhea, constipation
- Emotional: fear, anxiety, nervousness, confusion
- Muscles/joints: aches, weakness, stiffness
- Neurological: fine tremor, lack of concentration, learning disorders, memory loss, slurred speech
- Energy: chronic fatigue or restlessness
- Sleep disturbances
- Headaches
- Frequent illnesses

60

Harris Poll, August 26, 2014

- 34% of Americans believe vaccines linked to autism
- 19% of US adults believe vaccines "a little bit safe or not safe at all"
- Percentage that see vaccines as safe or very safe:
  - 92% Matures (70+ years)
  - 83% Baby Boomers (50-70)
  - 76% Gen Xers (30-50)
  - 68% Millennials (<30)
